

Key Property Features for Map Dowsing

Instructions for Generating a Site Plan of Your Property

1. Draw the overall shape of your property, using most of the grid below.
2. Draw the footprint (outside walls) of your home in the approximate location and scale to the property drawing.
3. Indicate streets, driveways, parking, and fences (or other boundary markers).
4. Add the North directional arrow to indicate orientation on the map.
5. Add any important features on the land...large trees, flowing water, boulders, slopes, etc.
6. Indicate anything on the property or in the neighborhood that is unsightly or out of context.
7. Divide the property into front (building to street), back (to back of property), left and right sides.
